

## Download Requirements

Python

<https://www.python.org/downloads/>

OR <https://www.anaconda.com/distribution/>

MongoDB

<https://www.mongodb.com/download-center/community> (Server tab)

pymongo

pip install pymongo

***Python** uses the **pymongo** library to talk to the **MongoDB** server. In this case the server is on your machine but it can be set up on another computer and accessed using internet protocols.*

## Use mongoDB through python

Run & read jsonDump.py and Demo.py
